A weekly journal to be published in Washington, under the sanction of the Washington National Monument Society.

JAMES C. PIGKETT, EDITOR AND PUBLISHER.

The Monument is intended to be a literary, agricultural, and miscellaneous paper. It will contain selections of the literature of the day—the best that can be found in American and English publications: interesting scientific articles, embracing mechanics; foreign and domestic news; a synopsis of the proceedings of Congress, and every thing that such a journal might be expected to contain, with the exception of party politics, which will be at all times most rigorously excluded.

The Monument will be published for the express and the sole purpose of aiding in the erection of the noble column now rising on the banks of the Potomac, in honor of the Father of his Country, and which every one who venerates the name of Washington would rejoke to see completed. After deducting out of the subscription the expenses of the journal proposed to be published, the remaining funds will be faithfully applied, and without reserve, to the purpose indicated. The aid, therefore, of all who are willing to contribute to so patriotic an object, and one so entirely national, is carnestly requested. By subscribing to the Monument, a valuable journal at a low price may be obtained, while it will be doing something, at the same time, towards completing that majestic memorial of the Nation's gratitude.

The Board of Managers recommend Mr. Pickett, formerly Fourth Auditor of the Treasury and Charge d'Affairs to Peru, who proposes to edit and publish the Monument journal, as one well qualified to perform the duties of editor, and to conduct the paper faithfully, and satisfactorily to the subscribers. They assure their fellow-citizens that this enterprise is not a speculation got up for individual emolument. Mr. Pickett will make the experiment with his own means and at his own risk; if successful, he will receive nothing more, and he asks nothing more, than a very moderate compensation for his services. Not one dollar, therefore, of the direct subscription to the erection of the M Monument Society. JAMES C. PICKETT, EDITOR AND PUBLISHER. object of our exertions.

As all editors and publishers, on account of the object for which the Monument newspaper will be established, must wish it to succeed, it is hoped that they will contribute to its success by publishing this prospectus.

All moneys will be remitted, and all letters and moneys addressed prepaid, to the general agent of the Monument Boefety, Hon. Silahs Whittlessy, Washington.

OFFICERS—Millard Fillmore, ex-officio President; Arch. Henderson, First Vice President; Watter Lenox, (Mayor of Washington.) Second Vice President; Thos. Carbery, Third Vice President; J. B. H. Smith, Treasurer; Geo. Watterston, Secretary.

BOAND OF MANAGERS—Winfield Scott, N. Towson, Thos. Munroe, W. A. Bradley, P. R. Fendall, Walter Jones, Thomas Blagden, Peter Force, W. W. Seaton, M. F. Maury, T. Hartley Orawford, Benj. Ogle Tayloe, Elisha Whittlesey, Terms.—The MONUMENT will be printed on a double-royal sheet—the paper and type being of the best quality—and in quarto form, containing sixteen large pages, that it may be more easily preserved. The price will be two dollars per annum, payable on the receipt of the second number. The nature of the enterprise not admitting of any credit, none can be given.

Societies and clubs will be furnished with the MONUMENT on the following terms: 3 copies for \$5; 5 copies, \$8; 10 copies, \$15; &c.

Those who are disposed to patronise the MONUMENT are required to forward their names to the General Agent, without delay. The first number will be published early without delay.

requested to forward their names to the General Agent, without delay. The first number will be published early in May, and the second on the second day of August, and weskly thereafter; time being allowed for the Prospectus to be circulated, and for the agents to make returns. As all subscribers will be contributors to the Monument their names will be published in the paper.

With this Key to their contents, the English Common Law Reports present to the Profession a mass of legal learning in the shape of Opinions, Data, elaborate Arguments, &c., &c., sumicient, probably, for the Elucidation and Prosecution or Defence of any case that can arise in our Courts of Law; and being thus made easily and instantly accessible, these Reports will be found so comprehensive, convenient, and cheap, as to supersede the necessity of other or more expensive scales.

The Index will be found of great value to all possessing the Reports; and of great convenience to those having access to, but not owning the series.

Gentlemen.—In reply to your lotter, I can with great sincerity say, that I emtertain a very high opinion of the recent Exchequer Reports. In my judgment they are not excelled by any cotemporaneous Reports, in learning, ability, or general utility and interest. The cases decided are discussed with great care, and expounded with uncommon force. I scarcely know of any volumes which I deem of more importance or value for a Professional library.

JOSEPH STORY.

CAMBRIDGE, January 25, 1845.

Gentlemen: Your letter of the 24th has been received, in which you ask my opinion as to the value of the English Exchequer Reports, from Price downwards to this time, to an American Lawyer, and as to the expediency of reprinting them in this country. Of the high value of these Reports, both on the Pleas and Equity sides of the Court, I have not the least doubt—the decisions of this Court for the last fifteen or twenty years, both at Equity and in Common Law, being entitled to equal respect with any others in England. I should think an American Lawyer's Library essentially incomplete without them.

I am gentlemen, very respectfully yours,

Law Library.

Fourth Series—Forty Volumes.

Twelve Dollars a year, bound—Ten Dollars in Numbers.

The cheapest Law Periodical in the United States.

It is our determination to make the Law Library the cheapest series of reprints of English Law publications in this country. The Editorial Department will, we trust, be found fully to realize the expectations of those who have anjoyal Smith's Mercantile Law, Touchstone, Broom's Legal-Maxima, Archibolt's Nisi-Prius, Archbold's Landlord and Tenant, Crabb on Real Proporty, Smith on Contracts. The high reputation which the "Law Library" has acquired, throughout the United States, by the character of its volumes, and by the cheap rate at which its valuable contants have been presented to the Profession, is the hest evidence we can offer of its merits and its claims for your support. We hope, and will aim, to retain this high character.

FURNISHING MAIL LOCKS AND KEYS.

FURNISHING MAIL LOCKS AND REYS.

POST OFFICE DEPARTMENT,

March 14, 1851.

I T being desirable to substitute locks and keys of some
other kind for those now in use for the mail service
of the United States, specimen locks and keys, with proposals to furnish the same, will be received and considered
at the Fost Office Department until the first day of July
next. The different locks will be submitted to a commission for examination and report. Upon this report; contracts will, as soon as practicable, be satered into for furnishing such locks and keys for four years, with the right

to extend and continue the contract in force for an additional term of four years, by giving to the contractor a written notice to that effect, not more than nine nor less than six months before the termination of the first term of four years.

With a view of procuring the best lock at the lowest price, no kind of lock is prescribed as a standard, the Department relying for a selection on the mechanical skill and ingenuity which a fair competition, now invited, may develop. It is, however, proper to state that a lock suitable for the mail service should possess the following qualities, viz. durability, uniformity, lightness, and strength. For the purpose of displacing simultaneously all the mail locks and keys now in use, about thirty thousand new locks and twenty thousand keysadapted thereto will be required to be furnished by the contractor within seven menths after the contract shall have been entered into: afterwards the annual supply will depend on the durability of the locks and keys adopted, as well as the increase of the mail service; but it will probably never exceed in amount three thousand of the former and one thousand of the latter.

No lock will be considered if it be like any aiready in general use; nor will any one with whom the contract may be made be allowed to make, sell, or furnish, any lock or key similar to those contracted for for any other purpose or use than that of the Peat Office Department.

The kind of lock adopted must be patented, and the patente will be required, on entering into contract, to make an assignment of his patent for the exclusive mes and benefit of the Department, if the Postmaster General shall deem such requirement essential to the interests of the service. In case of the failure of the contract new with any other party or parties as he may see fit, for furnishing similar locks and keys, in a deciding upon the proposals and specimens offered the Postmaster General shall deem that course for the interest of the Contract. The contract is contain provisions for the de

HUNT'S MERCHANTS' MAGAZINE

Letter from the Hon. Henry Clay.

Asitians, 20th July, 1840.

Dear Sir: I wish to express to you the gradification I derived on receiving the July number of the Marchante Magazine and Commercial Review, from viewing journ portrait in the beginning, and from reading your allowed to your friends at the end of it. When we feel under obligations to those who have contributed to our haformas it o your friends at the end of it. When we feel under obligations to those who have contributed to our haformas it or the friends at the end of the third property and the feel under of their countenance, and of the character and habits of their mind, which we can acquire. You have placed your numerous readers (at least you have me, if I may not speak for them) under those obligations; and the number of your valuable work now befire me, in some degree, satisfies the desire to which I have allusted.

I have become quite familiar with the Magazine and Review, and have no hestation in expressing my frum ble opinion that it is embantly entitled to the public regard and support. It collects and arranger, in good order, a large amount of valuable statistical and other infograntion, highly useful not only to the merchant, but to lie statesman, to the cultivator of the earth, to the manufacturer, to the mariner, in short, to all classes of the business and reading community.

Entertaining this opinion, I am glad that it has been, and hope that it may continue to be, liberally patronized.

Offering you cordial assurances of my esteem and regard, I fan truly your friend and obedient servant.

Extract of a letter from Hon. Millard Fillmort.

"I have read it (Merchants' Magasine) with a good deal of attention, and have no heatation in saying that I hink it one of the most valuable periodicals that was ever published. To the merchant it seems quite indispensable, and to the statesman and man of general information, almost equally desirable. It is a grand repository of useful facts and information, which can be found nowhere so well digested and so accessible as in these numbers. I only regret that I do not own the whole work."

Latter from the Hon. Thomas II, Benton.

Washington City, April 29, 1849.

Mr. Freeman Hunt.—Sir: I owe you many thanks for the opportunities I have had to read the Merchants' Magazine, and have found it in reality to be a magazines, and that well replenished, of all the useful matter which the title would imply, and presented with a fullness and clearness which delights while it instructs. It is, in fact, a merchants' magazine in the large acceptation of the term—merchants who go between nations, whose large operations bring many departments of knowledge, and a view of the state of the world, into deligh equisition. But it is not the great merchant only, but the one of more modest, but, nevertheless, of most useful operations—the merchant of the interior also—who will find this magazine to abound with the information the pursuit of his basiness and the elevation of the mercantile character requires. Nor is its stillity at all confined to merchants, but variants to the legislator and diplomatist and to all who are charged with managing the affairs of the putton. For myself, I have found it most useful to me in my senatorial shore, and have been in the habit for many years of carefully consulting it.

Yery respectfully, sir, your obedient servant,

THOMAS H. BENTON.

My Dear Sir: Have the goodness to place my name on your list of subscribers for the Merchants' Magazine. I regard it as an invaluable work for the use of all who would understand not merely commercial operations in this extending country, but the fiscal and commercial questions involved in the administration of the government.

BALTIMORE PIANO FORTE MANUFACTORY. BLASTIC* UNIVERSAL TOUCH.

WISE & BROTHER, Manufacturers of Boudoir, Grand, and Systere Pianes, request those who would be assured of a first class Plano, one that ladies can perform on with the greatest possible advantage—one that the touch an be instantly adjusted to the exact strength of the general and movement of music, one that will stand in concert tame, one that the tone will not become shrill and crating, that is chaste of style and elegantly made up of traight and regular curve lines, that will last an age—to give them a call. The ancient standing of the Ballimore factory, and liberal patronage of citizens and others of the first order of artistic taste and acience, concoded at once the most critical, have been fully anticipated. Their recently finished Grand Plano, minutely reviewed by the most accomplished civil engineers and master artists, has been denominated truly a Grand Plano; also, that their late Boudour, for style, power, and compass of tone, is not surpassed, if equalled, in the world. Friends and customers, please stop in and examine for yourselves.

COLD SPRING WATER CURE. THIS NEW AND SPLENDID ESTABLISHMENT for the scientific treatment of the various discusses with which the human system is afflicted, is situated about three miles from the city of Buffalo, in a rural spot, and

which the informal system is afflicted, is situated about three miles from the city of Buffalo, in a rural spot, and so accessible from all points as to be reached without inconvenience or delay.

A line of omnibuses runs from the steamboat landings in Buffalo to the springs every ten minutes.

The house and grounds are near the extensive and beautiful green-houses and nurseries of the Messrs. Hodges & Bryants; and the scenery in all directions is unsurpassed, as regards either variety or beauty; embracing points of view, from which may be taken in at a glance the broad expanse of Lake Eric, the Ningara flowing majorities of view, from which may be taken in at a glance the broad expanse of Lake Eric, the Ningara flowing majorities of the Falls, extensive forests, and the "Queen City of the Lakes," with its moving panorama of steamboats and ceaseless minerprise.

The water, taken immediately from the celebrated "Cold Spring," is unsurpassed as regards coldness and purity, by any in the United States. The house, recently erected at a cost of about seven thousand dollars, has been fitted up in a neat and elegant style, at considerable axtra expense, and is sufficiently capacious to accommodate sevently-five patients.

Connected with the establishment, and constituting one of its attractions, are the fixtures and conveniences for innocent and healthful gymnastic exercises.

and is permanently associated with the before mentioned

of control. And the friends of the establishment deem it
a matter of felicitation that the services of Miss Mary M.
Taylor, a lady of high medical attainments, who has attended two courses of lectures in the Central Medical College, have been secured, and that female patients can at

lege, have been secured, and that female patients can at any time avail themselves of her invaluable aid and counsel.

The steward's department is under the control of a gentleman eminently qualified for that position; and unwested in a way, to ensure the confort and promote the health and happiness of all who may wish to avail themselves of its benefits. Baths of all descriptions, adapted to the curs of the various forms of disease, and constructed on a scale not inferior to those of any other establishment in this country.

An enlightened public sentiment has everywhere repudiated a reckless use of drugs in the treatment of disease; while intolerable sufferings and broken constitutions have imperatively demanded "Reform." A return from a wide and fatal departmer from the simplicity of Nature's law is called for, alike by a rational love of happiness and the deplorable extgenies of our condition. Hydropathy, or a scientific use of water as a restorative and curstive agent, is a practical substitution of a simple and remarkably efficacious mode of curing the sick; for that system of drugging, depleting, and canterising, which, in obtaining the mastery over disease, too frequently pinces the patient beyond the reach of further annoyance. The success of the various Water Cure establishments in this country, to say nothing of any other, has fully confirmed the hopes of the early discoverers and promutigators of the great truths upon which the system is founded, and renders verbal communications unnecessary. It is deemed sufficient to asy, that the "Cold Spring Water Cure" will compare favorably with any of the well-conducted establishments of a similar character, and will be found equal to the best, as regards the order, convenience, and dealerablemes of its arrangements. The institution is now open for the reception of patients, and in full operation.

Ice Creams, Water Ices, &c.—Patented September 19, 1848.

THE distinguising merits of this Apparatus are—

1st. The astonishing rapidity of the process, surpassing belief—hence the mane.

2d. The Cream during the progress of freezing becomes charged with atmospheric air, by which it nearly doubles in bulk, and obtains that peculiar smoothness, lightness, and delicacy of flavor, for which the Ice Cream of our best Confectioners is so highly prized.

3d. It does not require a tenth part of the labor that the common Freezer does.

4th. It does its work bester, producing a better article, in every respect, than by any other mode.

5th. There is a considerable saving in ice, as the tub needs no replenishing during the operation.

The annexed testimonial from the Proprietor of the Eutaw House will put to rest all doubt.

"Having witnessed the process of freezing Ice Cream having hear frozen in the incredible short time of six minutes, I cheerfully recommend it to the public."

H. F. JACKSON,

Eutaw House, Baltimore, May 16, 1848. Bowark Academy.

By a late re-organization of this department of Delaware College, the Board of Trustees have taken measures to place it upon a new and improved foundation, and to endow it with advantages possessed by few similar institutions in the country. The Academy, heretofore merged in the College, and of course subjected to all the evilishing which have been found to attach the smallyamation of the two departments in the same building, and under the same government, now enjoys the privilege of a separate establishment, without losing those which result from its relation to the College proper.

A large and elegant edifice, with all the necessary fixtures of a complete boarding establishment, has been exceted and furnished, in which the students of the Academy board, under the immediate charge of the Principal and his Assistants; and all its exercises are conducted on a system of its own, uninterrupted by the interests or operations of the other department. The furniture of the study comes and dominitures has been chosen with peculiar redorence to combet and convenience for study and no expense has been spared in providing the apparatus necessary to render the means of instruction complete; giving to Newark Academy facilities for privade study and comfortable accommodation of students, fully equal to those afforded by many of our colleges.

From its intimate relation to the College, students of the Academy enjoy many advantages not generally obtained at institutions of this kind. Those who wish to pursue some particular branchs which falls more properly within the College clustes. Students also of proper age and discretion, by recommendation of the Principal, and permission of the Faulty, may enjoy the use of the College Library without additional charge. Admission also may be had to the Lecture, and such other privileges of the College as can be profitably enjoyed by academical sindents.

The charge for Boarding, Washing, Fuel, Light, &c., with tuition in the English, Latin, and Greak is seventy ideas for Wewark Academy.
